

UniSchedule User Guide

Chapter 1 : Introduction to UniSchedule

Welcome to UniSchedule, the official academic scheduling portal for Uva Wellassa University (UWU). This system provides students, lecturers, resource managers, and administrators with a centralized platform to manage timetables, module registrations, and university resources.

Chapter 2 : Student Dashboard & Navigation

The Student Dashboard gives you a quick overview of your academic life. You can view your upcoming classes for the day, see your total registered modules, and check the latest notifications. The side navigation panel allows you to quickly jump between your Timetable, Semester Registration, and Support pages.

Chapter 3 : Viewing Your Timetable

Navigate to the Timetable section using the left sidebar. Here you will see a weekly grid showing all your scheduled classes. You can click on any class session to view detailed information including the module name, lecturer, venue, and timing.

Chapter 4 : Semester Registration

At the beginning of each semester, you must register for your modules. Go to the Semester Registration page, select the core and optional modules for your upcoming semester, and submit your registration. You will be notified once it is approved.

Chapter 5 : Getting Help & Support

If you face any issues, visit the Support Center. Here you can find FAQs to common problems. If you cannot find an answer, use the "Report an Issue" button to instantly email the IT Center with details of your problem. Make sure to provide a clear description of the issue so it can be resolved quickly.
